

CATERPILLAR BULB 1003246 NEW

Product Images

Description: Work Lights help turn night into day and increase productivity of both machines and operators. Cat miniature lamps fit into tight spaces and illuminate to give excellent visibility in Cat products. Attributes: Premium Cat Lights are designed to meet the demanding vibration levels of both large and small machines. Cat Lights are adaptable to other machines in your fleet, and can be retrofitted to older machines. Clear T-2 3/4 bulb with Ba9s base, international T4W category. Shock and vibration resistant design increases lamp survivability. Better visibility and illumination. Less frequent re-lamping reduces maintenance costs. Application: Widely used across Cat product lines wherever dependable lighting is essential. Designed for use in extremely tough conditions.
