

CATERPILLAR MOTOR GP-E /STA 2071556 NEW

Product Images

Description

Built to work hard and deliver reliable performance even in tough, dirty, bitter-cold conditions, Starters are designed to handle the high current needed when cranking cold engines. Every time. The Brush-Type Design uses one-piece brushes for less maintenance, and constant-pressure springs for even brush wear. Cat Starters are engineered to be part of a balanced electrical system, working in unison with the rest of your Cat engine components. Each unit is rigorously tested, so you know you're getting genuine Cat reliability. Off-the-shelf availability minimizes your down time, and all Cat diesel engine parts come with a 12-month warranty.

- Designed to crank to -32 °C (-25 °F).
- Unmatched starting capacity compared to even the best competitors' products.
- Highest sealing and anti-corrosion specs in the industry: seamless, one-piece solenoid casing that protects against corrosion, vibration and extreme weather.
- You're buying less downtime and lower repair bills, helping you achieve the lowest owning and operating costs over your engine's lifecycle.

Additional Information

Brand	CATERPILLAR	
Condition	ORIGINAL	
Applications suitable (detailed)	Name	Models
	EARTHMOVING COMPACTOR	825C 825G 825G II 826C 826G 826G II
