

CATERPILLAR RING BACKUP 4T5070 NEW

Product Images

Description

Description:

Backup Rings prevent seal extrusion in high pressure applications, and may be used to protect the life of overall sealing system from pressure surges.

Attributes:

Backup Rings are designed in conjunction with the elastomeric seal and mating components, and contribute significantly to the life and performance of the sealing system in high pressure applications.

Backup ring dimensions are consistently held to tight tolerances to ensure they properly bridge the seal groove and the mating surface. Materials are selected for their pressure and abrasion resistance.

Backup rings may be solid or split. Split rings are used for ease of assembly.

Cat Sealing systems protect more expensive parts from leaks and contamination. Protect your investment with Genuine Cat Seals.

Applications:

Backup rings are used in high pressure static and dynamic sealing applications, such as hydraulic pumps, valves and engine systems.

Additional Information

Brand	CATERPILLAR	
Condition	ORIGINAL	
Applications suitable (detailed)	Name	Models
	EARTHMOVING COMPACTOR	826G II
	MOTOR GRADER	130G 160G
	CHALLENGER	65 65B 75
	WHEEL-TYPE LOADER	916 926 926E 936 936E 936F 950B/950E 950E 950F 950G 950G II 950H 960F 962G 962G II 962H 966D 966E 966F 966G II 966F II 966G 970F 972G 972G II 980F 980F II 980G 980H G916 G926 G936
	WHEEL-TYPE SKIDDER	508
	BACKHOE LOADER	446
