

## CATERPILLAR BEARING THRUST 6L4081 NEW

### Product Images

### Description

Description: Cat thrust needle roller and cage assemblies are designed for large axial loads, high rotational speeds and smooth operation. Thrust needle rollers and cage assemblies deliver high performance in a small envelope. Attributes: • High axial load capacity. • Supports high rotational speeds. • Requires minimal mounting space. • Through hardened needle rollers ensure maximum bearing life. • Easy to install. Application: Thrust needle roller and cage assemblies are designed to support high axial loads and rotational speeds. A typical application for thrust needle roller and cage assemblies is in transmissions where they provide low friction in limited space.
