

## CATERPILLAR DISC 6Y7932 NEW

### Product Images

### Description

Description: Cat drive train components must endure incredible torque, high impact loads, and frequent direction and gear changes. Cat designs and manufactures its transmissions and final drive components with these demands in mind. The result is a drive train that lasts longer and works harder over the life of the machine. Cat friction discs are designed to work within the transmission system to absorb the high power and energy during shifting. Attributes: • Multiple parallel groove pattern optimized for cooling. • (52) tooth internal spline provides exact OEM fit. Application: Cat friction discs are used as part of the transmission system to provide maximum performance and life to the drivetrain. Consult your owner's manual or contact your local Cat Dealer for more information.

## Additional Information

Brand	CATERPILLAR	
Condition	ORIGINAL	
Applications suitable (detailed)	Name	Models
	MOTOR GRADER	120H
	CHALLENGER	65 65B 65C 65D 65E 70C 75 75C 75D 75E 85C 85D 85E 95E MT700
	WHEEL-TYPE LOADER	928F 938F 938G 938G II 938H
	WHEEL-TYPE SKIDDER	515 525
	INTEGRATED TOOLCARRIER	IT28F IT38F IT38G IT38G II IT38H
	OEM SOLUTIONS	TA19-M2WD TA19-M4WD
