

## CATERPILLAR SEAL & CYL 1183955 NEW

### Product Images

### Descripción

#### Description:

Complete hydraulic cylinder arrangements actuate numerous machine components ranging from steering controls to refined movement of blades, buckets or other attachments.

#### Attributes:

Complete Cat hydraulic cylinder arrangements consist of tube and rod assemblies that are ready for installation on a machine. Cat cylinders are manufactured with thick tube walls that enable more service lives. This feature, when combined with exclusive Cat Oversize Seals, can extend cylinder life in many applications.

#### Recommended Application:

Complete Cat hydraulic cylinder arrangements are designed for specific machine applications.
