

CATERPILLAR BEARING 9U8242 NEW

Product Images

Description

Description:

Cat radial needle roller and cage assemblies are self-contained, ready to mount bearings designed to be used where the housing bore and shaft can act as raceways. They are designed to carry large loads and function smoothly and dependably through high rotational speeds.

Attributes:

- High strength cage
- Outside Diameter: 51.948 mm (2.045 in)
- Inside Diameter: 39.22 mm (1.544 in)
- Height: 31.67 mm (1.246 in)
- High load carrying capacity and stiffness.
- Supports high rotational speeds.
- Lowest cross-section among rolling bearings

Application:

Typical applications for radial needle roller and cage assemblies are planetary gears, constant-mesh gears, idler gears and connecting rods, Consult your owner's manual or contact your local Cat Dealer for more information.
