Omschrijving

Description: Cat tubes are held to the highest standards of quality and reliability. These rigid tubes (also commonly referred to as pipes) are designed to convey liquids or gases and are precisely engineered for each unique application. Each Cat tube utilizes superior materials and processes, fabricated specifically to withstand the application's pressure and flow requirements which will ensure a long life and proper machine functionality. Engineered with a specific application in mind, every Cat tube is designed and manufactured to exacting tolerances to ensure proper alignment with existing systems on your Cat Machine. Attributes: • Designed to withstand application specific working pressure • OEM direct replacement Application: Cat tubes are application specific. They are used in fuel pump injection systems in Cat engines. Consult your owner's manual or contact your local Cat Dealer for more information.
